The Four Pillars of Maternal Digital Care

Track

Monitor pregnancy progress, appointments, test results, and critical medications seamlessly.

Inform

Access reliable, locally relevant advice regarding nutrition, mental health, and physical well-being.

Remind

Deliver timely alerts to ensure mothers never miss Ministry of Health (MOH) clinic visits, scans, or vaccination schedules.

Empower

Actively involve mothers in their own healthcare journey, improving their awareness of risks and teaching them what to ask their doctors.

The Market Disconnect: Fragmented Care in Sri Lanka

Feature	WeCare	D2D Care	Maternal Guides	My Baby	Mathru	අම්මා (Amma)
Mother-Centric UI	✓	—	—	✓	—	✓
Culturally Relevant / Bilingual	—	—	—	—	✓	✓
MOH Clinic & System Integration	—	✓	✓	—	✓	✓
Holistic & Mental Health Support	—	—	—	—	—	✓

Current solutions force a compromise: they are either highly clinical but inaccessible to mothers, or user-friendly but disconnected from the local health system.

The Bridge to Better Care

අම්මා

(Amma)

The Mother

Seeking simple, reassuring, and local guidance for a healthy pregnancy.

Functioning as the missing link between home care and clinical care in Sri Lanka.

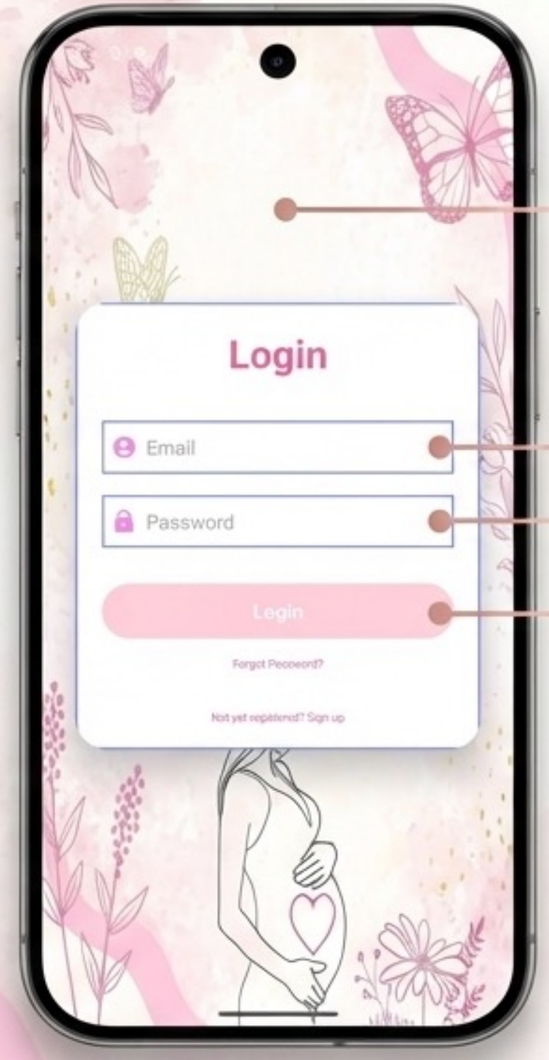
- **Personalized & Local:** Translating dense clinical guidelines into simple, culturally relevant, bilingual content.
- **Fully Integrated:** Directly aligned with MOH clinics, national guidelines, and digital antenatal records.

National Health System

Providing technical FHB/SLCOG guidelines and strict MOH schedules.

NotebookLM

Secure, Welcoming, and Private



User-Centric Onboarding

A welcoming interface designed to reduce anxiety and build trust from the very first interaction.

Data Protection

Secure sign-up ensures personal health tracking and digital antenatal records remain strictly private—solving a critical security concern found in existing local apps.

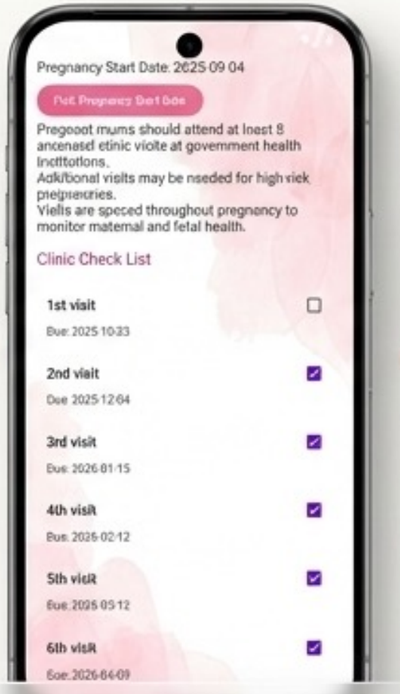
Personalized Journey

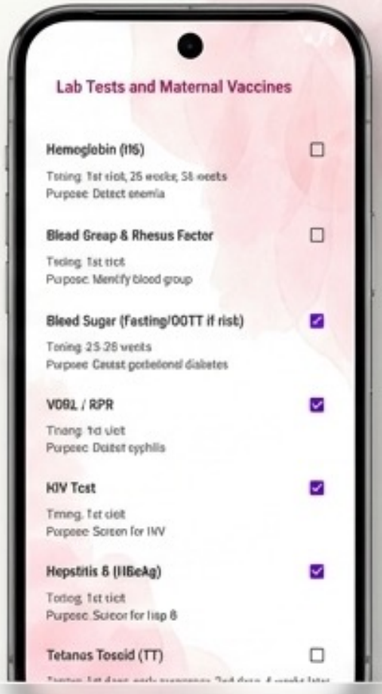
Account creation acts as the gateway to customized pregnancy tracking, generating an accurate timeline based on the mother's specific gestational age.

NotebookLM

The Clinical Command Center

Fully aligned with national healthcare requirements.





Appointment Planner:
Centralized dashboard to manage MOH checkups, scans, and reports.

Clinic Checklist:
Automatically tracks the mandatory 8 antenatal clinic visits required at government health institutions, spaced correctly by start date.

Essential Diagnostics:
A comprehensive checklist for critical maternal lab tests ensuring no essential screening is ever missed.

NotebookLM

Milestones & Medical Histories

Quantitative Peace of Mind

Automatically calculates the current week and day of pregnancy, offering mothers a reassuring, real-time countdown to their delivery date.

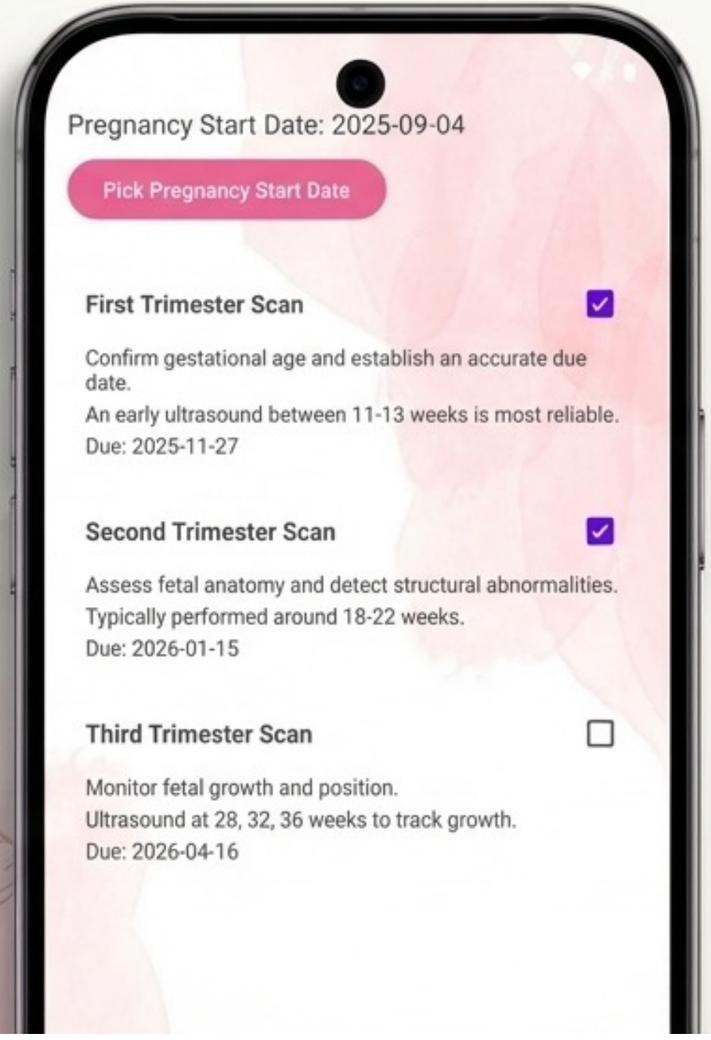
Qualitative Medical History

A powerful digital version of the mother's records. Captures vital histories (parity, living children, distance from hospital) to ensure healthcare workers have complete context during visits.

NotebookLM

Demystifying Diagnostics

National clinical guidelines are highly technical. ąęo translates them into actionable insights, ensuring mothers arrive at the clinic ready to actively participate in their care.



First Trimester (11-13 weeks)

Explains the need to confirm gestational age and establish an accurate due date via early ultrasound.

Second Trimester (18-22 weeks)

Prepares mothers for anatomy assessments, highlighting the importance of detecting structural developments.

Third Trimester (28+ weeks)

Educates on the crucial monitoring of fetal growth and optimal positioning prior to delivery.

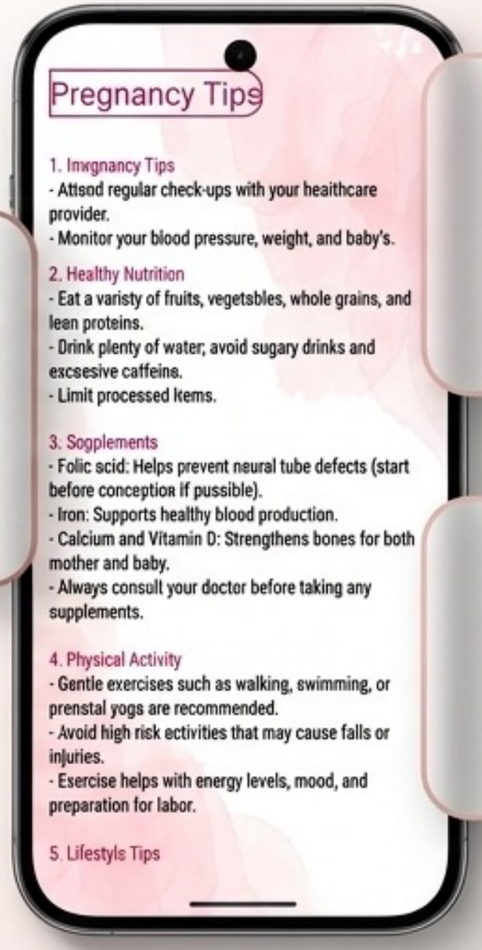
NotebookLM

The Localized Knowledge Hub

Access to a curated library of pregnancy care, mental health, and well-being advice tailored for Sri Lanka.

Culturally Relevant Nutrition

Moves beyond generic Western advice to offer actionable dietary guidance specifically suited to Sri Lankan foods, meals, and local availability.



Supplement Management

Clear, jargon-free guidance on essential micronutrients like Folic Acid, Iron, and Calcium, aligned directly with local prescribing practices.

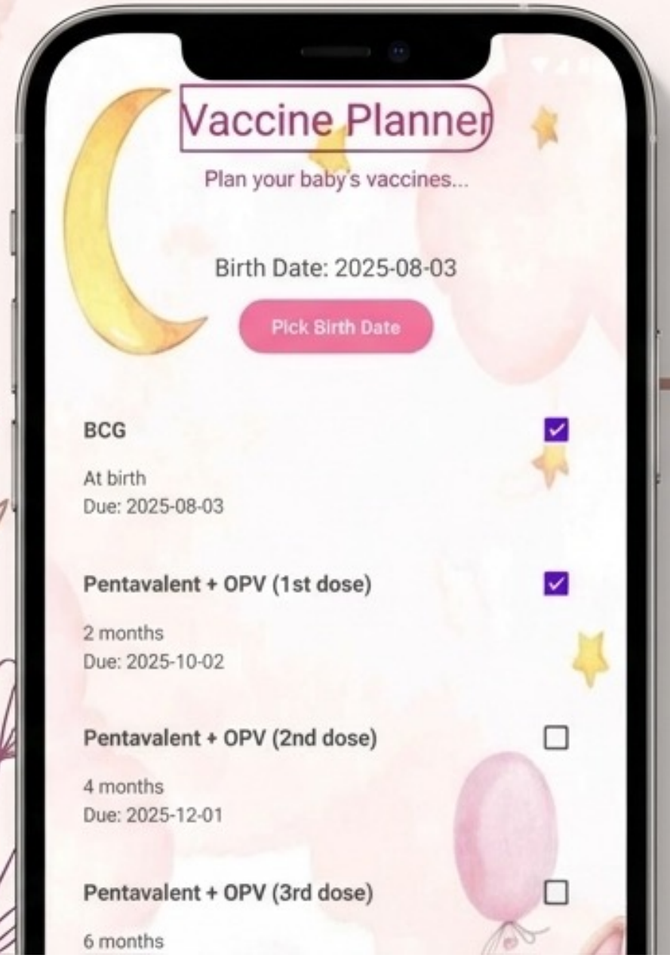
Lifestyle Guidance

Practical tips on physical activity, mental health, and prenatal care adapted to the local environment and cultural practices.

NotebookLM

Beyond Birth: Early Childhood Care

The journey doesn't end at delivery. ඇමා transitions seamlessly into vital postpartum support.



National Immunization Integration

A dedicated baby vaccination planner that calculates exact due dates automatically based on the baby's precise birth date.

Month 0 | Month 2 | Month 4 | Month 6 | Month 9 | Month 12

Automated Scheduling

Tracks mandatory doses for BCG, Pentavalent, OPV, Measles, and Japanese Encephalitis according to the strict Sri Lankan national immunization schedule.
